

OUR ORIGIN

ETIS TECHNOLOGY GROUP was born thanks to the entrepreneurial initiative of Arcangelo Leone, the company unique executive. It has been existing on the market for 30 years with the technical and commercial support of Arcangelo's children, Giuseppe and Raffaele. The company operates in the field of installation and maintenance of private and public systems, both urbane and industrial.

THE FUTURE: 365 DAYS OF GOOD WEATHER

We offer our clients the real opportunity to improve the quality of their lives using alternative and renewable energy sources.

With the Energy Count and the latest grants introduced by FINANZIARIA 2007, and through correct planning of integral systems, it is possible to reduce the actual energy bills for all types of habitations, offices, industrial and commercial buildings, etc...

With renewable energy, the free solar one, in particular, we are engaged in providing the energy and making any current illumination system, electrical apparatus and air conditioning system work, personalizing our offer for an intelligent and ecosustainable house or office.

We will help you to be able to become possible auto-producers or energy providers, supplying or exchanging your photovoltaic energy directly with the National Electrical Network through the local electrical distributor(ENEL or others).

Our Technical-Project Office, giving estimates and financial assistance, with reference to the actual laws and national and community incentives, favours the more advanced and innovative solutions for Energy Savings.

(V.A.I. Kyoto Protocol)

THE ENERGY OFFER

- PHOTOVOLTAIC ARRAYS
- SOLAR THERMAL COLLECTOR
- COGENERAZION
- TRIGENERAZION
- AEOLIAN
- BIOMASS
- GEOTHERMIC
- COMBUSTIBLE STORAGE

OUR BUSINESSES

In the Regions which incorporate its range of business, the ETIS TECHNOLOGY GROUP is able to commercialize circuits, equipment products and spare parts.

A 24 hours a day, 7 days a week Assistant Service has been created for the safety and guarantee of our clients. It is made up of company professionals and technicians and supported by company-owned mobile truck workshops, ready to assist each operation requested. Moreover, the Company is committed to underwrite Bilateral contracts of annual assistance covering expenses and eventual risks.

Each workplace is made up of operational service teams directed by the group that will be able to supply information and illustrational/descriptive, technical or simply commercial material.

BUILDINGS/INDUSTRY

"CASACLIMA" zone agents (PASSIVE HOUSE and low-energy consumption buildings) in bio-architecture.

We also offer advices on energetic certifications on buildings.

ENERGY DIVISION

SOLAR PHOTOVOLTAIC

Electric energy production systems.

Planning and realization of any power system grid connected and stand alone.

The technical department arranges also the Conto Energia documentation.

SOLAR TERMIC

Planning and realization of solar systems at natural and forced circuit for hot sanitary water with integration within industrial and artisanal production processes as integrative heating systems certification SOLAR PASS INSTALLA.

AEOLIC

Aeolic generators equipments, planning and direction for any power works (one, two, three bladed).

COGENERATION AND THREE GENERATION

Realization of cogeneration and three-generation for the electric energy production.

Winter and summer air conditioning for commercial and residential buildings, sanitary, tourist, hotel, industrial structures.

GEOTHERMIC

Realization of air conditioning systems and hot sanitary water through geothermic heating pumps with probes in entrenchment and undersoil.

BIOMASSES

Supply and Realisation for any type of residence, handicraft buildings , structures of breeding livestock, industries (with products of discard and recovery), vegetable oils, marc, discards of pruning, corn, wheat, boilers to pellets.

DOMOTIC

Intelligent systems for the management of the buildings.

IN OUR SHOWROOM YOU CAN FIND THE FIRST POINT COMPLETELY DEDICATED TO THE ENERGY SAVING.

Visitable during the office working time.

The Group furnishes you consultation and useful information, on the initiatives of the Government and the European Community to stimulate the works finalized to the energetic saving.

SYSTEM DIVISION

AIR CONDITIONING

Planning and realisation of different dimension systems: canalisation, roof tops, chiller, refrigeration, VFR systems, air treatment unity, heat regeneration, dehumidification / humidification of environments for bio climatologies.

HEATING

Gas and gasohol implantations for energy saving, pallet boilers, wood boilers, oil marc boilers, vegetation rejects boiler, thermic fireplaces.

ANTIFIRE AND GAS

Antifire systems (G letter) and gas conveyors (E letter)

PE2+PE3 WELDING CERTIFICATION

(POSE AND POLYETHYLENE ELECTRIC WELDING)

WATER TREATMENT

Urban and industrial water treatment, construction and maintenance of public and private swimming pools, impounds checking and monitoring, catchment tanks for potable water and not.

COMBINED SYSTEMS - BIOARCHITECTURE

The company's forte is the coupling of renewable energies with such systems which perfectly interact: floor, ceiling, wall, radiative systems, absorbing heating pumps in accordance with bioarchitecture principles.

TECHNICAL DIVISION AND GLOBAL SERVICE MAINTENANCE

Our society is present on the market even in the field of the services' maintenance flattering a wide clientele which goes from the urban systems to medium and great systems of air conditioning and heating for private and public organisations and differential power stations using GLOBAL SERVICE.

TRAINING DIVISION

ADVISING AND FINANCES

ETIS TECHNOLOGY GROUP focuses constantly on future by searching new potentialities both at an organisational level and at a technologic one.

For this reason an internal didactic hall of about 3.000 m³, has been created with a video conference system, internet position and a satellite connection.

If required by any other company, it is also possible to organise technical trainings with all inclusive formula.
